Skills

Computer vision

PyTorch

OpenCV

C++

Solidity

Rust

Tensorflow 2.0

I like to research state of the art deep learning models and implement them in PyTorch. Look forward to continue my research in deep learning and computer vision!

Work History

2022-08 - Current

Computer Vision Researcher

VisualCamp

Train appearance based gaze estimation models. Research in knowledge distillation and domain generalization.
Implement normalization techniques.

2021-09 - 2022-03

Co-founder

XREAL

Metaverse club based at Seoul National University. Hosted XREAL Metaverse Conference, inviting VR Startups, professors and industry experts. Built a 3D version of GatherTown with the team in Unity with Photon, AWS, and MySQL.

2021-06 - 2021-08

Data Science Intern

Miragesoft

Worked no data preprocessing and Implemented K-Nearest Neighbor and other machine learning algorithms.

2021-04 - 2021-06

Back-End Engineer

Pairy

Node.js, Express, MySQL, AWS, Docker

2020-06 - 2020-08

NLP Data Engineer

MyCelebs

Data preprocessing to train the company's NLP BERT model.

2019-06 - 2019-08

Deep Learning Intern

Pintel

Yolov3 for weather recognition. Data preprocessing. Hyperparamter Tuning.

Education

2020-08 - Current

Bachelor of Science: Computer Science

Georgia Institute of Technology

2021-03 - 2022-02

Visiting Student: Electrical And Computer Engineering

Seoul National University
